

# 分母の違う 分数の足し算

③

月 日 曜日

名前

次の計算をしましょう。答えは約分しましょう。

$$(1) \quad \frac{3}{4} + \frac{1}{5} = \frac{15}{20} + \frac{4}{20} = \frac{19}{20}$$

$$(11) \quad \frac{1}{3} + \frac{3}{13} = \frac{13}{39} + \frac{18}{39} = \frac{31}{39}$$

$$(2) \quad \frac{3}{8} + \frac{2}{7} = \frac{21}{56} + \frac{16}{56} = \frac{37}{56}$$

$$(12) \quad \frac{2}{5} + \frac{1}{3} = \frac{6}{15} + \frac{5}{15} = \frac{11}{15}$$

$$(3) \quad \frac{5}{6} + \frac{1}{7} = \frac{35}{42} + \frac{6}{42} = \frac{41}{42}$$

$$(13) \quad \frac{2}{14} + \frac{2}{8} = \frac{12}{56} + \frac{21}{56} = \frac{33}{56}$$

$$(4) \quad \frac{1}{2} + \frac{5}{31} = \frac{31}{62} + \frac{10}{62} = \frac{41}{62}$$

$$(14) \quad \frac{1}{6} + \frac{2}{10} = \frac{5}{30} + \frac{6}{30} = \frac{11}{30}$$

$$(5) \quad \frac{3}{7} + \frac{1}{3} = \frac{9}{21} + \frac{7}{21} = \frac{16}{21}$$

$$(15) \quad \frac{1}{11} + \frac{1}{22} = \frac{2}{22} + \frac{1}{22} = \frac{3}{22}$$

$$(6) \quad \frac{5}{9} + \frac{4}{15} = \frac{25}{45} + \frac{12}{45} = \frac{37}{45}$$

$$(16) \quad \frac{4}{9} + \frac{5}{12} = \frac{16}{36} + \frac{15}{36} = \frac{31}{36}$$

$$(7) \quad \frac{1}{3} + \frac{5}{11} = \frac{11}{33} + \frac{15}{33} = \frac{26}{33}$$

$$(17) \quad \frac{1}{6} + \frac{2}{5} = \frac{5}{30} + \frac{12}{30} = \frac{17}{30}$$

$$(8) \quad \frac{2}{5} + \frac{5}{12} = \frac{24}{60} + \frac{25}{60} = \frac{49}{60}$$

$$(18) \quad \frac{2}{9} + \frac{2}{5} = \frac{10}{45} + \frac{18}{45} = \frac{28}{45}$$

$$(9) \quad \frac{5}{8} + \frac{1}{5} = \frac{25}{40} + \frac{8}{40} = \frac{33}{40}$$

$$(19) \quad \frac{1}{2} + \frac{5}{19} = \frac{19}{38} + \frac{10}{38} = \frac{29}{38}$$

$$(10) \quad \frac{7}{15} + \frac{1}{2} = \frac{14}{30} + \frac{15}{30} = \frac{29}{30}$$

$$(20) \quad \frac{1}{17} + \frac{1}{3} = \frac{3}{51} + \frac{17}{51} = \frac{20}{51}$$
